

**Dr. Eng. Angelo FRACCHIA**  
**([angelo.fracchia.gm@hvcc.it](mailto:angelo.fracchia.gm@hvcc.it))**

Mr. Fracchia has a Doctorate Degree in both Electrical and Mechanical Engineering, with 40+ years of experience in High Voltage components, as Power Transformers, GIS, Rotating Machines, Switchgear, etc., as well as High Voltage Laboratories, including laboratory design and testing of any kind of equipment.

Power Transformers: Mr. Fracchia is one of the most experienced *international expert* on this component, covering all technical aspects, as technical specifications, design from scratch, design review, quality assurance, testing, fault analysis, condition assessment and life extension.

Throughout his career, Mr. Fracchia has performed hundreds of projects at international level, having gained experience in around 40 countries, in Europe, Middle East, Asia, America (North, Central and South).

Mr. Fracchia has performed many forensic investigations on Power Transformers failures, including few cases in court hearings, as well as failures analysis on GIS and other HV components.

Mr. Fracchia is owner and founder of HIGH VOLTAGE COMPONENTS COMPANY S.R.L., an Italian company, and business partner with HV Trafo Solutions, a Romanian company and ENERGY SOLUTIONS INTERNATIONAL S.A.C., a Peruvian company.
